PROFESSIONAL SUMMARY

Passionate machine learning engineer with over 5 years of experience in developing and optimizing scalable models using Python and TensorFlow. Demonstrated success in improving client operations by 30% through data-driven insights and cross-functional collaboration. Achieved a 20% increase in user engagement, reflecting a commitment to impactful, innovative machine learning solutions.

SKILLS

Python, Data Analysis, Statistical Analysis, A/B Testing, Machine Learning, Scikit-learn, Feature Engineering, Model Training, TensorFlow, GitHub, Collaboration

EXPERIENCE

- Machine Learning Engineer 01/2024 - Present Insight Data Solutions San Jose, California Develop and deploy machine learning models that increased client revenue by 15% within 12 months using TensorFlow and scikit-learn.
- AI Specialist 02/2021 - 06/2022 TechNova Systems San Jose, California Designed AI algorithms that improved predictive capabilities by 18%, enhancing client data processing capacities.
- Data Scientist 06/2022 - 12/2023 Cortex Analytics San Jose, California Optimized machine learning models, reducing computation time by 40% while maintaining model performance using ensemble techniques.
- Implemented solutions using Python, leading to a 25% reduction in processing errors and improved reliability of client insights.
- Collaborated effectively with UX designers and product managers to ensure seamless integration of AI solutions into user interfaces.
- Collaborate with data scientists and engineers to integrate models into client systems, improving workflow efficiency by 30%.
- Conduct comprehensive data analysis and feature engineering, enhancing model accuracy by 22% through refined data processes.
- Applied statistical analysis and data manipulation to solve client issues, resulting in a 35% increase in operational efficiency.
- Mentor junior team members, fostering a team environment that led to a 25% increase in knowledge retention and skill development.
- Collaborated with non-technical stakeholders, enhancing understanding of data-driven insights and fostering decision-making improvements.
- Communicate technical results to cross-functional teams and stakeholders, resulting in a 50% improvement in project alignment and understanding.
- Led A/B testing initiatives that validated model improvements, resulting in a 20% increase in user engagement for client products.
- Provided technical guidance, facilitating a team environment where cross-disciplinary collaboration increased solution effectiveness by 15%.

PROJECTS

- GitHub: <https://github.com/ellawhite/project2> KEY ACHIEVEMENTS Increased Client Engagement Achieved a 20% increase in client product engagement through innovative machine learning model optimizations.
- Open Source Predictive Model Developed a predictive analytics model for healthcare data to enhance patient outcomes.
- GitHub: <https://github.com/ellawhite/project1> Collaborative NLP Toolkit Created an open-source NLP toolkit for semantic analysis on social media trends.

- Efficiency Improvement Initiative Reduced model training time by 40% through extensive algorithm optimization and parameter tuning.
- Data-Driven Decision Support Enhanced data-driven decision making for clients, leading to a 30% improvement in operational accuracy.
